We are delighted to announce MODA’s Sixth Annual Outdoor Show: Sculpting the Suburban Landscape. The 2019 edition celebrates the 200th anniversary of the English tradition of landscape gardening in the United States. It exemplifies the history, the landscape and the garden design of the English tradition in the American landscape. It brings together the best in traditional and contemporary landscape design and celebrates the art of landscape gardening in the United States.

The show takes place on September 28th and 29th. It features over 30 exhibitors, including landscape architects, garden designers, and landscape contractors. The show will include demonstrations, workshops, and lectures on a wide range of topics, including history, design, and construction.

The show is free and open to the public. It will run from 10:00 am to 5:00 pm on both days. The show will be held at the MODA Center, 1201 SW 4th Avenue, Portland, OR 97205.

Plot 9

Strawberries

Sowing date: May 10th, 2023

Plot 9 is dedicated to growing strawberries. The area is designed to maximize sunlight and ventilation, ensuring optimal growth conditions for the plants. The soil is rich in organic matter, providing a healthy base for the strawberries to thrive. The rows are evenly spaced to allow for easy access and maintenance.

Plot 10

Blackcurrants

Sowing date: April 25th, 2023

Plot 10 is focused on cultivating blackcurrants. The blackcurrants are planted in a staggered pattern to allow for maximum sunlight exposure. The soil is well-draining, which is ideal for the healthy growth of blackcurrants. The plot is surrounded by other fruit plants to support pollination and pest control.

Plot 11

Asparagus

Sowing date: March 15th, 2023

Plot 11 is designated for asparagus production. The asparagus plants are sown in a single line, allowing for efficient harvesting and growth. The soil is prepared to support the deep root system of asparagus, ensuring strong plant health.

Plot 12

Cauliflower

Sowing date: April 10th, 2023

Plot 12 is set aside for growing cauliflower. The plot is designed with a stable microclimate that provides the ideal conditions for cauliflower growth. The soil structure is optimized to retain moisture, supporting the development of robust cauliflower heads.
